

Take One Project

As a whole school we pick an artist and a painting that they have created and use it to produce our own art and craft work.

This work is then displayed in the entrance of the school.

Our artist this year was LS Lowry and the painting VE day.

The children used different shapes to draw around and cut out to make the houses and factories. They then used charcoal to add the smoke from the chimney; finally they drew their people in the style of LS Lowry. We also produced

house bunting. The children also used their skills on the computer to produce house and factories. They looked closely at the picture taking elements from it and used these to produce artwork in the style of Andy Warhol.
