

## Neolithic Stone Age Houses

In year 3 and 4 we have been making our very own Neolithic Stone Age Houses in our Design and Technology classes. We had to design our houses first and think about what materials we wanted to use. Then we started making our houses with clay bricks. To make our roof frame we had to saw pieces of wood to make sure they were the correct size. It was so much fun getting to use the saw. After we had attached our frame to our houses, we added straw to cover the roof. We are so proud of our houses!

Here are some of our finished houses.
