

## Year 2 Carbon Monoxide workshop - February 2018.

Year 2 were visited by Bonanza Creative and their mascot Safety Seymour to talk to the children about Carbon Monoxide safety. We started off the day by learning about what Carbon Monoxide is and where we might find it in our home. The children watched a video and were introduced to Safety Seymour! Safety Seymour told us about what appliances in the home emit Carbon Monoxide and how to keep safe. We also learnt some fun actions to help remember the key facts about Carbon Monoxide (we can't see, hear, taste or feel it!).

Throughout the day the children participated in various activities including role play, paired work and group work. Children also made their very own Safety Seymour puppet to take home, and designed a safety poster to spread the key messages from the workshop.

All children were given a Carbon Monoxide alarm to take home and children will take it in turns to take home a Safety Seymour teddy to help spread the word about how to keep safe!

Here are some photos from our fantastic workshop.
